WORK EXPERIENCE

➤ Adobe (2017 - present)

Noida, India

Technologies:

Python, Selenium, Java, Maven, Jenkins, Kafka, Neoload, Git, Perforce, Sikuli, Django

Project: Adobe Premiere Elements (Video editing product)

- Accomplished automated functional and performance testing of Face detection library for over **1000+ test data**
- Designed high-quality test automation framework for Mac OS platform using Java Extendscript, Python and C++.
- Actively driven QA activities in the team in Agile model and strive for shipping top quality product with high confidence
- Cross-team collaboration for conduction of bug-hunts, platform-oriented testing and exploring inter-operability issues

Project: Adobe Sign (cloud based e-signature service)

- Developed utility tool using Django, Python and Bootstrap to automatically generate API test cases using intelligence on API properties.
- Designed an extremely stable Rest API test framework (with 95%+ success rate) for a commercial platform for Adobe
- Lead quality assurance efforts for team of 12 members while mentoring 2 QA engineers.
- Implemented CI/CD pipeline for test automation using Git and AWS services resulting in an efficient development process

➤ PayU Payments Pvt. Ltd. (2015 - 2017)

Gurugram, India

Technologies:

Java, PHP, Apache Tomcat, JBoss, Docker, MySQL, Linux server, Postman, Git, JIRA, Jenkins, JMeter

Project: Treasury

- Design SMS feature in test automation to send alerts whenever pass percentage falls below threshold.
- Extend Test Automation framework for major features: Reconciliation & settlement process, TDR/convenience fee model using Selenium (with Java language)
- In-depth understanding & testing of end to end payment flows in finance domain.
- Configure and manage Mac/Win machines on Jenkins for Continuous integration

➤ Principal Global Services (2013 - 2015)

Pune, Maharashtra, India

Technologies:

Selenium, Ranorex, Java, MySQL, Git, JIRA, Jenkins, IBM's Web content management

Project: Advisor Digital

- Agile Scrum Team Member – as Automation developer
- Redesigned automation suite for creating 13 different types of content and its verification on portal with varying access rights using Selenium
- Test planning, design & creation, Test ID & data creation, Test execution, User Acceptance Testing, Regression analysis, Automation planning/execution and Defect logging
- Daily conference call interactions with scrum team in US for planning and test execution status

CERTIFICATES / ACCOMPLISHMENTS

Udacity

Graduated in Data structures and Algorithms Nanodegree (06/2021)

Microsoft OpenHack

Certification for OpenHack - AI-Powered Knowledge Mining (11/2019) held at Adobe, Noida

Coursera

Machine Learning Specialization: University of Washington (01/2020)

Scaler Academy (See profile [here](#))

Mentoring students in computer science since Aug 2020.

Udemy

Algorithms and data structures in Python (03/2020)

ISTQB

ISTQB Foundation Level Certification for Software Testing (08/2014)

High School

Secured 1st position at State Level for coding project at Kendriya Vidyalaya School Science Exhibition. Participated at National level in Dehradun (2006)

EDUCATION DETAILS

B.Tech in ECE : CGPA - 8.38/10

Faridabad, Haryana, India

YMCA Institute of Science and Technology

2008 – 2012

Class XII : Aggregate 85.0%

Faridabad, Haryana, India

KV. No. 1 (CBSE)

2007-2008

Class X : Aggregate 88.3%

Faridabad, Haryana, India

JIVA Public School (ICSE)

2006-2007

Thanking you in anticipation.
