Job: Senior Engineer, R&D Engineering

Western Digital.

Dear Ibrahim,

Welcome to your New Hire Portal! We are excited to welcome you to the Western Digital team. Your scheduled start date is Jan 29, 2018.

To facilitate your onboarding process, this portal is designed to help acclimate you to the company. It contains helpful information and paperwork for you to complete. If possible, we ask that you complete all necessary paperwork included in the new hire packet the Friday prior to your scheduled start date. Depending upon the country, you may need to bring appropriate identification information and signed documents to your first day. These details will be provided as you view and submit your paperwork in the subsequent pages to follow.

However, the Employee Invention & Confidentiality Agreement ("EICA"), is required before starting your employment at Western Digital. You must complete that document by noon the Friday prior to your scheduled start date. Due to company policy, you will not be admitted to the Orientation if you have not signed the EICA agreement by the required date and time.

After this page, the system will guide you through all the necessary paperwork that we require. If you need to complete the information at a later time, you can log back in with the username and password you created when originally applying for your position. If you have forgotten your password, click on the "forgot password" link on the login page.

If you need assistance or have any questions, please don't hesitate to contact your Recruiter.

Best regards,
Western Digital Talent Acquisition Team
