Date:

Respected Sir / Madam,

It gives me exorbitant pleasure in writing this letter of recommendation for my student Ibrahim Rupawala who is intending to pursue Master's degree at your esteemed institution. As a professor at Bhagwan Mahavir College of Engineering & Technology I know him for the past four years as an undergraduate student, where I offered courses in the field of Digital Communication and Networking and Engineering Electromagnetics. During this tenure, I gauged his innate abilities and found him strong on the concepts and applying them to tackle the problem.

Ibrahim's academic performance is above average as it is evident from his semester mark sheets and transcripts. His performance in Digital Communication and Networking (10/10) in 8th semester and Engineering Electromagnetics (9/10) in 5th semester which I have taught is very good. I can say that his overall performance is impressive. He has the capacity to express his views with confidence and conviction. He is an all-rounder who can balance his academics and other extra-curricular activities well.

As a student he was dedicated to assignments given to him and finished them on time. Perseverance, Sincerity and thirst of knowledge have always been the hall mark of his personality. He has also taken seminars in his college days. Proficiency in English through knowledge of the subject coupled with the style of his explaining in a clear and lucid manner made his seminars very interesting and informative.

With full confidence in his abilities, I strongly recommend him for his studies in your esteemed university preferably with suitable financial aid.

Yours Sincerely,

Mrs. Sumita Chakraborty
Associate Professor, Electronics Engineering Department
