

Menu Driven Program using Switch Case

```
#include <iostream>
using namespace std;

int main()
{
    cout<<"Menu"<<endl;
    cout<<"1. Add\n"<<"2. Sub\n"<<"3. Mul\n"<<"4. Div\n";

    int option;
    cout<<"Enter your choice no."<<endl;
    cin>>option;
    int a,b,c;
    cout<<"Enter two numbers"<<endl;
    cin>>a>>b;

    switch(option)
    {
        case 1: c=a+b;
                break;
        case 2: c=a-b;
                break;
        case 3: c=a*b;
                break;
        case 4: c=a/b;
                break;
    }
    cout<<c<<endl;

    return 0;
}
```
